WORKING WITH
PLANET MEDICAL

ONE PLANET

At the heart of Planet Medical is one of Australia's oldest and most iconic design and manufacturing success stories. Founded in 1911, Planet Lighting's journey to becoming one of Australia's most trusted provider of medical lights began over 100 years ago.

And we continue to lead the way, today. Three generations on, we provide the most extensive range of procedure and examination lighting and are the number one medical lighting supplier for Australian hospitals.

But we don't stop there.

DESIGNED AND MADE IN AUSTRALIA. EXPORTED TO THE WORLD.

We design, manufacture and test in house so that our customers receive the benefit of our extensive medical lighting and lighting specialist expertise. Our early adoption and development of innovative technologies, coupled with our ethos of sustainable design, means we can provide the best of today's technology and tomorrow's. Our commitment is to back you with one of the best guarantees and support in the industry – and we're there for you right from the early planning stage of your project.

Planet Lighting's Studio K lamp, first released 1962.

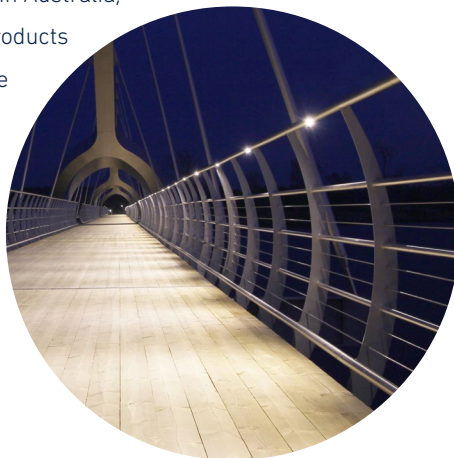

FAMILY AT HEART

Being a family business – and a historic one at that – we know the importance of stepping up our operations to face the technical or social challenges that life can throw at you at any time. And we put people first. Supporting a local regional community providing opportunities for a diverse staff of over 50 people, ranging from designers to machinists, we like to be an example of making a difference starting at home. We currently supply specialized Medical equipment making a difference to front-line healthcare workers during Covid-19. And being manufactured locally in NSW not only helps but also keeps our community engaged and creatively productive.

BEYOND MEDICAL LIGHTING

An early adopter of innovative and emergent technologies, we've been redefining the possibilities of LED lighting since 2002. In fact, our LED handrail lighting, LED Puck is the premier choice in integrated lighting and handrail projects in over 30 countries. Our next generation thinking is continuing to transform growing industries. In Australia, our latest Aquaculture lighting products are leading the way and are some of the most sought after lights from Norway to Chile.

HERITAGE

We have over 100 years of manufacturing experience and 60 years of lighting expertise up our sleeves. We've got the skills and the talent to deliver solutions that stand the test of time – and leave the light on for others.

LOCAL STAFF

We're proud of our team. Our positive gender and inclusive workplace fosters a diverse and thriving community, employing over 50 locals from all ages, genders, and cultural backgrounds.

EXPERTISE

Our engagement with our customers needs is what drives our expertise. We assist you right from the get-go: from design to construction phase and beyond. Being first in and last out means we've always got your back.

TRACK RECORD

Tried, true and blue, our products are installed in virtually every major Australian hospital as well as prominent overseas hospitals. We're Australia's first choice for medical lighting and for good reason.

MADE IN OZ

We make things better in Australia. Our innovative local design and manufacturing team make products sought after around the world. And we're pushing the boundaries of what's possible every single day.

STANDARDS

Our products meet and exceed strict global quality standards including IEC 60601-2-41. Our focus on quality is obvious in every product – and something that should be experienced.
