PHANTOM COTTON REEL

STRUCTURAL MOUNT FOR PROCEDURE LIGHT

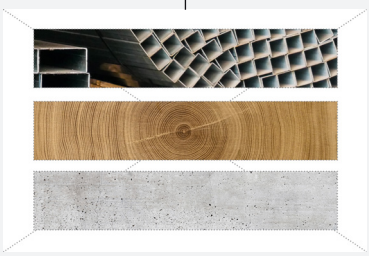
Let us take care of structural headache and stress with our made to order, locally made structural mount solutions. Designed exclusively for Planet Lighting medical lights, our cotton reel mounts address your structural needs and provide peace of mind for years to come.

PLANET
LIGHTING

Planet cotton reels mount to many types of structural mounting surfaces: timber, steel, and concrete.

Our pre-engineered steel cotton reels are designed to provide extensions to your structural ceiling, regardless of where it is located.

Our reels affix to structural timber, concrete slab, brick, and steel beams.



Pictured above, a Planet PHANTOM examination light attached to a cotton reel mount inside the ceiling void.

PHANTOM TYPICAL COTTON REEL AND CEILING MOUNT

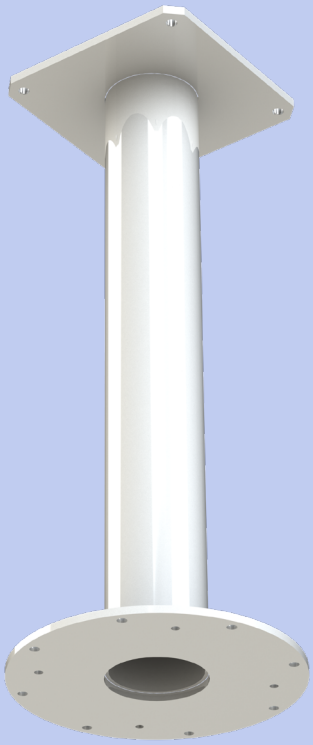
Do I need a cotton reel structural mount?

It depends. Often a structural mounting surface or structural ceiling (the point a light is designed to attach to) can be too high above the floor to achieve secure mounting.

Each medical light has a maximum standard mounting height threshold. In situations beyond this threshold, our pre-engineered steel cotton reels are designed to provide solid extensions to the structural surface. This ensures stability and integrity for your light regardless of where the structural surface is located.

COTTON REEL STRUCTURAL MOUNT



Designed and made in Australia. Let us look after your structural needs.

PRODUCT CODE	DESCRIPTION
CRPH (≤1000 mm)	Cotton Reel Structural Mount for examination light 1000 mm length and under (≤1000 mm)
