Terms & Conditions

1. All prices in NOK and are ex-works from the Planet Lighting factory in Bellinghen, Australia.
2. All payment terms net 30 EOM from the invoice date.
3. Any item ordered which requires modification from the above product codes must be quoted with custom pricing. Request a quote from Planet Lighting. Orders require a PO. Orders are then confirmed by Planet Lighting at which time the order is firm and production can begin.
4. Price list subject to annual updates and other terms per the existing supplier agreement.
5. Replacing o-rings when possible is recommended, so parts which need o-rings will be supplied with. Note that FIPP parts packs also include o-rings and are offered maintenance use rather than parts replacement.

Freight

Freight is not included in any pricing. Most small parts orders best sent via direct delivery: see "DHL-NO-15kg" pricing. Larger orders can be delivered, but freight will be charged at cost and may be invoiced later. Estimates of freight are available on request.
